MAULANA AZAD NATIONAL INSTITUTE OF TECHNOLOGY

HUMANITIES AND SOCIAL SCIENCES

EXAMINATION: MID TERM, October 2025

Course:M.Tech/M.sc/M.Arch Semester:I Subject: Technical Communication (HUM511)

Max. Marks: 20 Date:29/11/2025

Time: 60 mins

Note: Allquestions are compulsory.

QN	Questions	M
1.	Examine the process of reading scientific or technical research papers. Detail a step-by-step approach that moves beyond a simple, linear reading. Explain why a reader should prioritize certain sections (like the introduction or results) over others (like the abstract) during the initial read-through. What makes this reading process distinct from reading a user manual or a procedural document?	8
2.	A student is struggling with writing a paragraph that stays on topic. What advice would you give them? Explain the process of creating a paragraph using a step-by-step approach, from brainstorming to the final draft, emphasizing how to maintain focus. *Hint:* Focus on steps like brainstorming, creating a clear topic sentence, using a reverse outline, and editing for unity.	6
3.	Text 1: A study published in a journal suggests a causal link between daily coffee consumption and a lower risk of type 2 diabetes. The study is an observational analysis of a large population over several decades. Text 2: A different news report cites a review of multiple studies, concluding that the relationship between coffee and diabetes is not yet fully understood and that lifestyle factors may play a more significant role than coffee itself. Task: Based on your critical reading of both texts, explain why their conclusions appear to differ. What information is missing that would help clarify the relationship between coffee consumption and diabetes? Taking both texts into account, what would you conclude about the current scientific understanding of coffee's effect on type 2 diabetes? Justify your response with evidence from the passages.	6

Name of the Student:_____ Roll No. 2B2/101

EXAMINATION: END TERM **MONTH & YEAR : December 2025**

Course: M Tech **Semester: I** **Max. Marks: 40**

Time: 2 hours

Subject Name: Technical Communication **Subject Code: HUM-510**

Note : Attempt any 5 Questions.

Q.No.	Questions	Marks
1.	How do you prepare for a presentation from start to finish, and what steps do you take to ensure it is tailored to a specific audience?	8
2.	Discuss the importance of gender and general diversity in the workplace. What are the common barriers to achieving a truly inclusive environment, and what strategies can organizations implement to promote equal opportunity and representation at all levels?	8
3.	The rise of e-learning and digital technology presents new ethical challenges for educators. Examine the ethical issues faced by e-learners and e-teachers, such as data privacy, academic surveillance, and the appropriate use of user-generated content.	8
4.	The shift to remote work has made virtual meetings and asynchronous communication vital. Detail the essential etiquette rules for participating in a professional online meeting.	8
5.	"A report is written for a clear purpose and for a particular audience". Explain how conducting an audience analysis (considering their knowledge level, role, and expectations) influences the tone, language, level of technical detail, and overall structure of a report.	8
6.	How would your reading strategy change when approaching three different types of texts: a complex scientific journal article, a novel for a literature class, and a workplace instruction manual?	8
